

CLARKE ENERGY BREAKS INTO CHINA

Clarke Energy's continued success and worldwide growth has been enhanced with the addition of their latest office in Beijing, China.

Clarke Energy China Ltd will continue the successful relationship already established between Clarke Energy and GE Energy Jenbacher by becoming strategic partners for its gas engine range to tackle the potential gas to power market in China – primarily focussing on coal mine and coal bed methane, biogas and landfill gas, along with other similar applications.

Environmental awareness has been increasing rapidly in China and the need to embrace renewable power sources has never been greater. China has been integrating its six main regional grids to secure a nationwide power network for what is seen to be a period of growth in the Chinese power sector.

With an impressive record worldwide, Clarke Energy are able to bring the certainty of delivery, certainty to operate and certainty to provide technical support to its clients in China. Clarke Energy China are committed to providing a practical solution to address the safety, environmental, energy and social issues which China's power industry is facing from all of its energy resources.
