

CLARKE ENERGY'S RECORD BREAKING YEAR

2007 has been a record year for Clarke Energy Australia and Clarke Energy Nigeria. Both territories have seen a significant increase in sales, reinforcing the fact that there is an ever growing need for green energy solutions.

Clarke Energy Australia has seen its biggest growth within the coal seam and coal mine methane sector. This alone has helped sales exceed £40million in 2006/07 – over three times more than last years total of £13m.

Clarke Energy Nigeria on the other hand has increased sales, from £4m in 2006/07 to over £10m in 2006/07, by utilising the natural gas that is in growing supply throughout the country. By taking advantage of this natural gas to create energy, it is helping to provide a much needed secure and reliable power supply.

Ian Davis, Group Managing Director of Clarke Energy, said: "We are extremely pleased with the progress that has been achieved in both Nigeria and Australia. The staff we have in these territories have excelled themselves. Our perseverance and commitment to these regions can now be seen in the increased volume of sales. The Jenbacher gas engine and Clarke Energy's market expertise are a powerful combination for CHP and power generation throughout the world."
