Green Energy Solutions

CLARKE ENERGY INSTALL 300TH GE JENBACHER ENGINE

Clarke Energy Ltd are pleased to announce the sale of the 300th GE Jenbacher gas engine in the UK. The exclusive sales agreement signed between Clarke and GE Jenbacher in 1995 has led to Clarke Energy gaining, in recent years, a dominant 80% market share for landfill gas fuelled power generation in the UK.

GE Jenbacher's purpose built gas engines (not diesel conversions) have a proven reliability, high availability and market leading efficiency from a variety of gas fuel supplies. In association with Clarke Energy's unrivalled quality of product and service performance, installations of new units have continued to increase in the UK to give an 85% market share of Landfill site power generation over the past couple of years.

Note:-

Clarke Energy Limited is a leading worldwide Energy Systems Company offering a wide range of green power generation solutions with offices in Australia, France, India, Nigeria, New Zealand and UK. Clarke Energy employs over 150 people worldwide and operates as part of the Clarke Group.

Further information about Clarke Energy and its activities is available by contacting the Public Relations and Marketing Department on 0151 546 4446 or via email at: pr@clarke-energy.co.uk
