Green Energy Solutions

MAJOR DEALS SIGNED WITH POWER COMPANIES

Clarke Energy are proud to announce the confirmation of two enormous deals with nationwide power companies. The deals worth an estimated £40 and £60 million respectively are to build, commission and service 10MW power stations in the south of England and Wales for District Energy (part of British Energy), Scottish and Southern Energy. There will be around 40 such stations built, maintaining Clarke Energy's role as the national leader in distributed generation.

Distributed generation means that instead of there always being a large set amount of electricity to the grid, whether the demand is there or not, our Jenbacher generators can be turned on and off when the need arises. Due to the small size of the stations, they can also be located nearer to the destination of the electricity and thus reduce the loss of efficiency in distribution. These deals come after many months of dialogue and meetings with our new clients.

Speaking about the two new deals, John Munnery, Communications Director remarked: "The contracts demonstrate our competitiveness, initiative and versatility when it comes to gaining new business. These contracts were gained against the strongest competition the industry could offer from both Europe and the USA, and provides continuing opportunity to show how good we are in our chosen sectors of business.

John went on to say: "Congratulations and many thanks to those involved so far and in advance, further efforts will be needed to achieve our continuing performance of on-time, on-price and on-quality delivery. Our positive outlook towards fresh opportunity is demonstrated by the successful completion of the mines gas project for Independent Energy at Shirebrook, which we hope will lead to more applications of this type in the future. Of course our established market leadership in landfill continues with further business obtained from UK Waste (now Biffa) and CPL."

Note:-

Clarke Energy Limited is a leading worldwide Energy Systems Company offering a wide range of green power generation solutions with offices in Australia, France, India, Nigeria, New Zealand and UK. Clarke Energy employs over 150 people worldwide and operates as part of the Clarke Group.
