Green Energy Solutions

NEW HIGH EFFICIENCY COMPACT GAS ENGINE

Clarke Energy, the Green Energy Solutions company and exclusive Jenbacher AG distributor for the U.K. and Australia, is now able to offer a new development of the Jenbacher product range - the High Efficiency Concept (HEC) Engine.

Rated at 1.5MW on natural gas, the rated power output of the engine is around 40% higher than the current equivalent Jenbacher engine in the range. Essential components of the engine have been newly developed, drawing on more than 40 years of experience in gas engine manufacture.

The objective of the development was primarily a high degree of efficiency coupled with a reduction in service and maintenance requirements. The degree of mechanical efficiency, 44%, represents a level hitherto unknown for gas engines in this power range, one that is not even attained by new high performance diesel engines.

Note:-

Clarke Energy Limited is a leading worldwide Energy Systems Company offering a wide range of green power generation solutions with offices in Australia, France, India, Nigeria, New Zealand and UK. Clarke Energy employs over 150 people worldwide and operates as part of the Clarke Group.

Further information about Clarke Energy and its activities is available by contacting the Public Relations and Marketing Department on 0151 546 4446 or via email at: pr@clarke-energy.co.uk
